Subject: RE: NWIRP and NGC OU2 Technical Advisory Committee (TAC) Meeting

Steve,

It's been six weeks since this email. Is there a date yet for the next TAC meeting? Bethpage WD requires a detailed status and technical exchange of the various ongoings regarding the plume asap. We would like to see the meeting in January.

Thanks

Rich

Subject: RE: NWIRP and NGC OU2 Technical Advisory Committee (TAC) Meeting

Distribution,

The DEC does not yet have a hard date for the next Northrop Grumman and Naval Weapons Industrial Reserve Plant Site (NWIRP) OU2 Technical Advisory Committee (TAC) Meeting, other than is tentatively being scheduled sometime after New Years. However, I will be honing in on a more precise date in the near future based, in major part, on when the reports currently being prepared by NGC and NAVFAC are ready for distribution. review and/or comments. This list of reports include, but may not be limited to the GM 38 Area Capture Zone Analysis Report, the NGC Hydraulic Effectiveness Evaluation Report and the VPB 126-128 Area Work Plan.

I will be putting a draft agenda together for all to comment on shortly. For those new to the TAC, below is the reprint of Selected remedy section 8 of the DEC OU2 Record of Decision (ROD):

"The formation of a technical advisory committee (TAC) as deemed necessary by the NYSDEC, to be comprised at a minimum, of the involved Agencies, participating local water districts, Northrop Grumman and the Department of the Navy. The main purpose is to review and provide input on all materials relating to the implementation of the Northrop Grumman and NWIRP OU2 Groundwater Remedial Program and Public Water Supply Protection Program."

In the meantime, please feel free to contact me directly for any questions.

thanks,

Steven M. Scharf, P.E.
